Dear Customer:

Thank you for your interest in our signs. We feel you'll be pleased with these types of sign materials. The signs are all made of a tear-resistant and rot-resistant material which hold ink very well. We have experimented with these types of materials and find they will out-last paper or posterboard signs.

Enclosed you will find sample signs and price lists. There are two price lists for each sign material; one is for purchasing blank signs, the other is for having your name or club name imprinted on them. Also, we have available in pliable .014 yellow plastic and yellow crosswoven 11" x 11" signs for customers whose states require that size of sign. Both of these materials have extra UV protection for added longevity.

We look forward to hearing from you.

Thank You,
Rowe's Print Shop

Helpful Hints:
When writing on blank signs, use a permanent ink marker.
Also, when putting up Tyvek signs, fold the corners under for double thickness and just staple to board or tree.
